

SECURITY INTELLIGENCE SERVICE

Technology alone won't keep you safe. Seekintoo adds industry-leading security experts and methodologies to a cloud-based technology offering, to protect your vital information, assets & infrastructure.

EXPERT THREAT HUNTER SOLUTION

First, our team will first complete a full assessment of your SIEM. Then our analysts work with your stakeholders to strengthen it by mapping priorities and developing reports & alerts that are 100% relevant to your cyber security operations. Our team performs ongoing customized 24x7 threat analysis, monitoring and alerting but data never leaves your network as all our analysis is done on your devices, using secure connections. We integrate with existing systems and provide ongoing content refining, anomaly detection and pattern discovery.

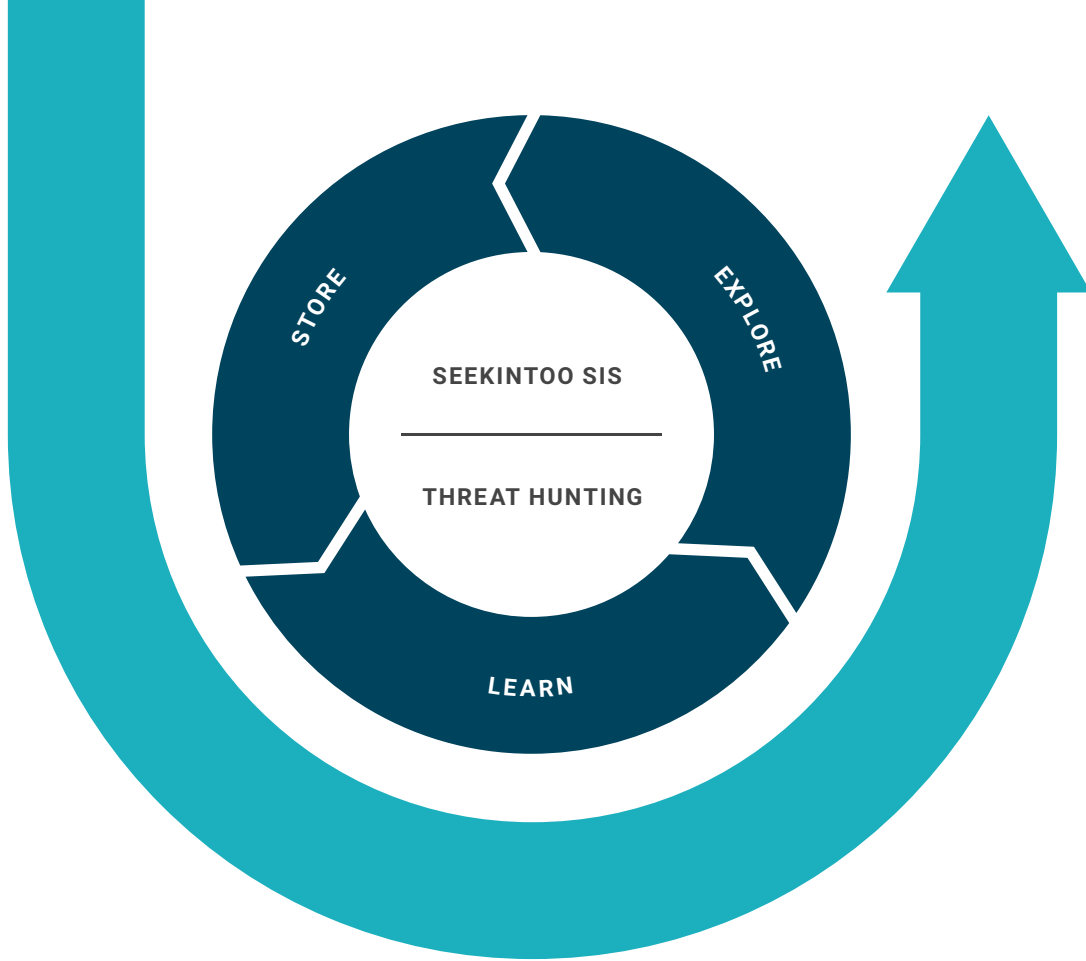

CLOUD-BASED TECHNOLOGY SOLUTION

Our cloud-based offering provides robust, reliable security while simplifying management of SIEM technology. You don't need any of your own hardware on the premises. Simply install agents and we work with the data you send us to keep your organization safe. Our pay-per-use model gives you the flexibility to grow or shrink your data analytics capabilities without major capital investment or licensing penalties - all without suffering any drop-off in performance. For those organizations looking for expanded security, we also offer additional outsourced threat hunting services on top of the technology.

SERVICE HIGHLIGHTS

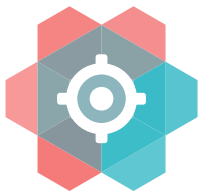

- ✓ SIEM and threat analysis specialists
- ✓ Monitoring and alerting customized to your environment
- ✓ Shared intelligence
- ✓ 24x7 coverage with automated dispatch and multi-contact escalation
- ✓ Integrate with existing ITSM or internal trouble ticketing system
- ✓ Ongoing updates and content refining
- ✓ Health and performance monitoring
- ✓ Anomaly detection and pattern discovery with deep analysis

MACHINE GENERATED DATA

ACTIONABLE INTELLIGENCE

Why Seekintoo?

ACTIONABLE INTELLIGENCE

Augmenting SIEM outputs with expert human analysis, we deliver relevant, meaningful security data and insightful reviews of all generated data and threats.

COLLABORATIVE APPROACH

Our clients are our partners and from day one we take their organization's security as seriously as we do our own. No matter the question, concern or threat, we're there to assist.

UNMATCHED SECURITY

Our expert team of security analysts provides an initial analysis and assessment of your SIEM and ongoing, evolving support to mitigate the ever-shifting threat landscape.

ABOUT SEEKINTOO

Seekintoo provides security intelligence, SIEM management, integration, and threat detection & response services for enterprise and government. We partner with our clients to understand their environment, leverage our shared expertise & experience and provide them timely, actionable feedback.

Our work is based on both public sources and our in-depth involvement in local, national, and international forums for security professionals.
